

Ohio Youth Soccer Association North Upgrades Data Management System with LeagueOne

LeagueOne to Simplify Administration, Registration and Roster Management

Richfield, OH - April 10, 2008 – The Ohio Youth Soccer Association North (OYSAN), a non-profit youth soccer organization dedicated to actively promoting the sport and representing approximately 70,000 players, coaches and administrators, has selected The Active Network's LeagueOne integrated online registration and data management solution that centralizes and simplifies sport-specific administration processes between associations, clubs and leagues.

"We are very excited about forming a relationship with the leader in online registration and state soccer association technology," stated Tom Faro, OYSAN Executive Director. "League One's offerings will merge our multiple systems and provide online registration, making the online process easier and more efficient for our administrators, members, coaches and players."

By implementing LeagueOne, OYSAN will be able to manage registration, risk management, roster management and team building processes more effectively and efficiently with each of its clubs and leagues. The projected result is accurate registration and risk management from beginning to end.

In addition, The Active Network recently upgraded OYSAN's existing Web site (www.oysan.org) to the Company's Active Content Management (ACM) system designed to allow non-technical users to effectively collaborate, edit and update the Web site using easy-to-use web publishing tools.

Active Sports, a division of The Active Network, provides industry-leading online registration, team/club/league management and marketing solutions to participatory sports organizations. For more information, please visit www.ActiveSports.com.
